PROFESSIONAL SUMMARY

Software Engineering graduate specializing in cross-platform application development with Flutter and Dart. Proven ability to deliver client-facing products end to end, including a custom point-of-sale system and a commercial veterinary clinic website, backed by Supabase and Firebase. Built an AI-powered nutrition app with a custom EfficientNetB0 model achieving 88.46% accuracy. Seeking a Flutter / mobile developer role to build reliable, user-focused applications.

PROJECTS

CUSTOM POINT OF SALE (POS) SYSTEM — CLIENT DELIVERY - *FLUTTER, DART, SUPABASE*

- Developed and delivered a custom POS system for a client, tailored to the business's operational requirements.
- Implemented inventory management for product and stock handling, plus employee and recipe management modules.
- Integrated Supabase as the backend for database storage and application data management.
- Built a centralized, business-focused application that streamlines day-to-day operations.

VETERINARY CLINIC WEBSITE (Commercial Product) – *FLUTTER, SUPABASE, MAPS, WHATSAPP API*

- Built a production-ready,resale-ready clinic website.
- Integrated Supabase for data storage, and real-time updates.
- Implemented Flutter Maps to show the clinic's live location and directions.
- Integrated WhatsApp API for direct client-to-clinic communication and appointment inquiries.

FITSAGE (FINAL YEAR PROJECT • Team Collaboration) -*FLUTTER, FIREBASE, ML (EFFICIENTNETB0),CALORIENINJAS API*

- Developed an AI-powered fitness and nutrition tracking app with personalized macro calculations, in a collaborative project team.
- Trained a custom EfficientNetB0 model on a self-curated 110-class food dataset, achieving 88.46% classification accuracy.
- Integrated the model for real-time food recognition, calorie estimation, and nutrition reporting.
- Integrated a REST API (CalorieNinjas) to retrieve nutritional information using HTTP requests and JSON parsing.

GYM MANAGEMENT APPLICATION(Collaborative Development) - *FLUTTER,SUPABASE,PROVIDER*

- Built a gym membership management app tracking member records, fee status, and upcoming dues.
- Implemented full CRUD operations with Supabase for cloud data storage, authentication, and real-time updates

EDUCATION

2022-2026

UNIVERSITY OF MANAGEMENT AND TECHNOLOGY (UMT)

BS Software Engineering
CGPA: 3.39/4.0

SKILLS

- Flutter & Dart
- Django
- C++
- HTML & CSS
- Object-Oriented Programming
- AI/ML & Data Augmentation
- Databases: Supabase, Firebase
- REST API Integration
- Git & GitHub
